

INFORMATICS COLLEGE POKHARA

Module Name:

Introduction to Information System

Module Leader:

MR. Krishna Wagle

⇒ Group Members:

- Pukar Gurung [Representative]
- Anuj KC
- Sudhil Gurung
- Sachin Adhikari

Introduction to our Project

Welcome to Our Project. Our Project is a Watch website where you can check, buy, and get information about different types of Watches. While working on this Project we had a group where there were altogether 4 members and all members worked on different field (Pukar)

worked on Product,documentation,Sudhuil worked on Research,Style,Sachin worked on about us,index and Anuj worked on Blog and JS.

Group name: Stellar Tech

Group Members:

>Pukar Gurung(Team Leader),Student ID=NP04CP4A240201

>Sudhil Gurung

>Anuj KC

>Sachin Adhikari

Goals and Objectives

- 1) Product showcase
- 2) User experiences optimization
- 3) Brand awareness and marketing
- 4) E-commerce and functionality
- 5) Customer support and engagement

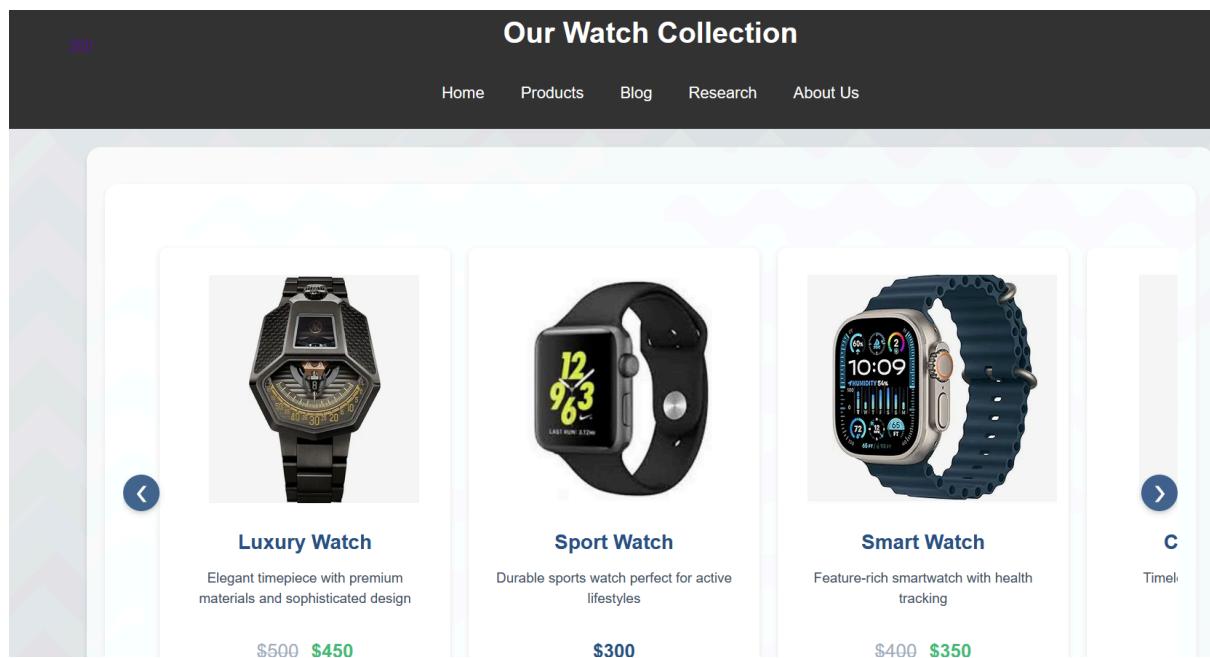

How HTML,CSS,JS are used.

1. HTML

The screenshot shows a responsive web page for a watch store. At the top, a dark header bar features the text "Welcome to 360" and a small "360" logo. Below the header is a navigation menu with links to "Home", "Products", "Blog", "Research", and "About Us". The main content area has a light gray background with a subtle chevron pattern. It contains a heading "Your Go-To Store for Watches" and a descriptive text block: "Discover the perfect watch for every occasion at 360. Whether you're looking for elegance or durability, we have it all." Below this, a section titled "featured watches" displays two products: a "Luxury Watch" (a green and silver Rolex Submariner) and a "Sport Watch" (a black Garmin smartwatch). Each product card includes an image, the name, and the price (\$21950 for the luxury watch and \$300 for the sport watch). At the bottom of the page, a dark footer bar contains the copyright notice "© 2025 "360". All rights reserved." and social media icons for Facebook, Instagram, and Twitter.

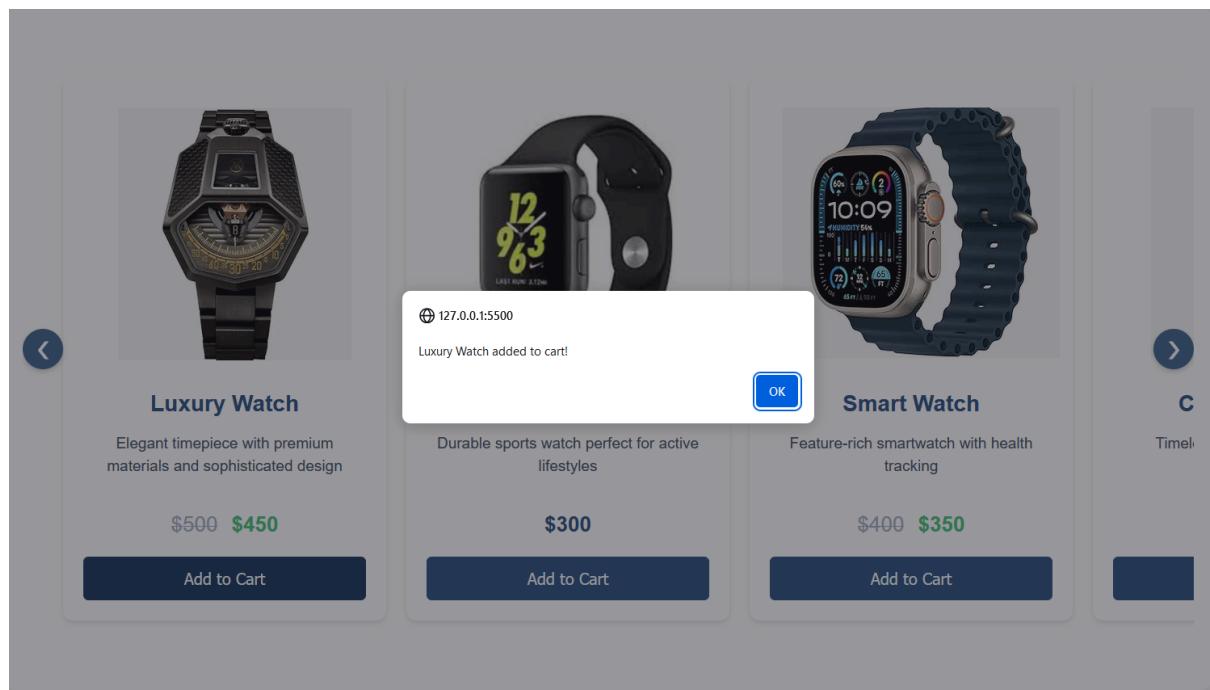

In this case with the help of HTML we are able to create a format for our home page and put a navigation bar ,create structure for headings,text,etc.We also are able to put images such as watch images and the logo of our page.

2. CSS

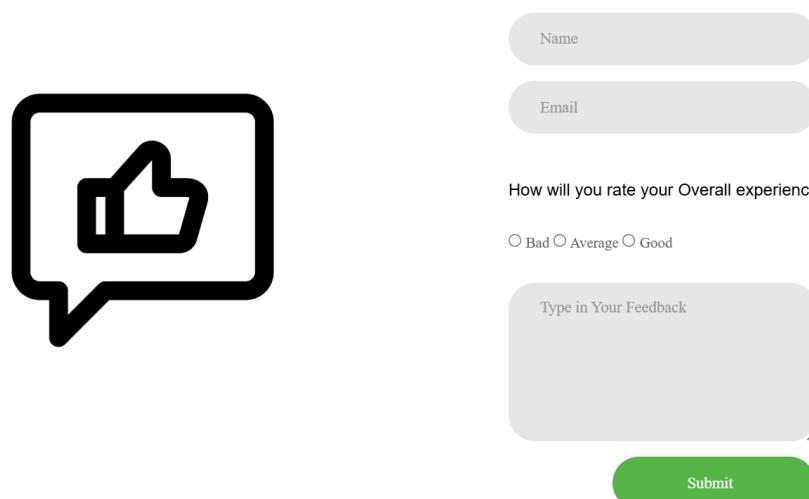

In this case by the help of CSS we are able to do padding. You can also see that we have inserted images in square shape and put space between each image . In the navigation bar we have put the background color i.e black and we have written heading in the middle by doing spacing and padding.

3. JS

As you can see that with the help of JS we are able to give a function that is when we click the Add to Cart button we get the result saying XYZ Watch added to cart. Also another thing we have done using JS is we have inserted a slider which show the products horizontally.

Provide Your Valuable Feedback

The image shows a feedback form with the following components:

- A large speech bubble icon containing a thumbs-up symbol.
- Two input fields labeled "Name" and "Email".
- A question "How will you rate your Overall experience?" followed by three radio buttons labeled "Bad", "Average", and "Good".
- A text area labeled "Type in Your Feedback".
- A green "Submit" button at the bottom right.

Also with the help of js our customers are able to give feedback and also rate the overall experiences about our website. You can give feedback by putting your name and email . There is a submit button by clicking it you are able to submit your feedback.

Discussion and Analysis

- Use of Text Editor

1. Visual Studio Code (VS CODE)

Visual Studio Code (VS Code) is a free, open-source code editor developed by Microsoft, designed for building and debugging modern web and cloud applications. It supports multiple programming languages, offers features like syntax highlighting, IntelliSense (autocompletion), debugging tools, version control integration, and an extensive library of

extensions for customization. Lightweight yet powerful, VS Code is highly popular among developers due to its speed, flexibility, and ease of use.

2.MS DOCS

MS Docs is a word processing application developed by Microsoft. It is part of the Microsoft Office suite and is widely used for creating, editing, formatting, and sharing documents. MS Word offers a range of features, including text formatting, spell checking, graphics insertion, and collaboration tools, making it ideal for professional, academic, and personal use.

Tools used while developing wireframe

These tools represent our website logo and icons images .

A Big Title

This tool is used to write a title for our Page.

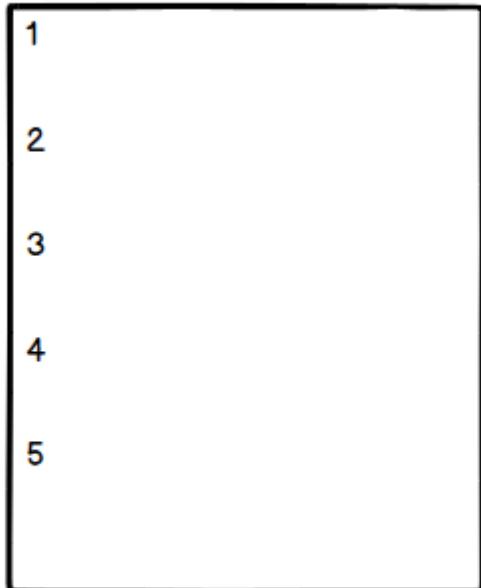

In our website Navigation bar which contains home,product,blog,research and Aboutus are represented by this tool.

Our website contains many Images which is symbolized by this tool.

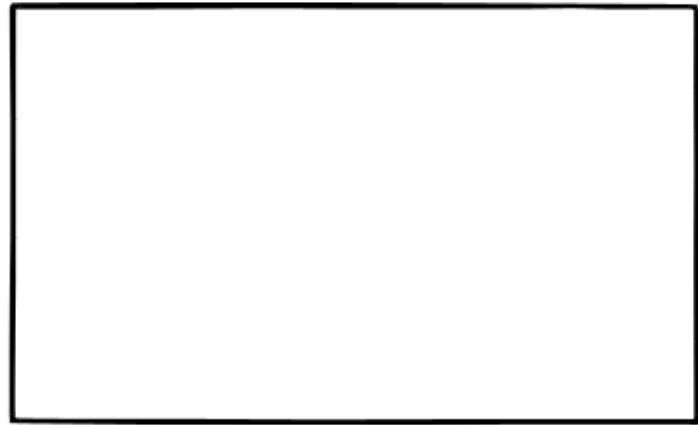

We have many other text or headlines in our website so we use this tool to represent it.

In our blog part the text or points are listed and this tool represents it.

< >

With the help of JS we have inserted a slider function in our website on product page and the above tool represents it.

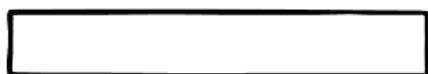

In our project there are many long paragraphs in blog and about us page and to describe that we have use this tool.

HISTORY OF WATCH

The watch was developed by inventors and engineers from the 16th century to mid 20th century as a mechanical device powered by winding a mainspring which turned gears and then moved the hands; it kept time with a rotating balance wheel. In the 1960s the invention of quartz watch which ran on electricity and kept time with a vibrating quartz crystal, proved a radical rise in watchmaking industry. During the 1980s quartz watches took over the market from mechanical watches, a process referred to "quartz crisis"

Impact of Technology on watch Industry

The watch industry has been around for centuries, and overtime it has evolved to meet the constant change in need and preferences of the consumer. As technology advances, the watch industry is also changing. Due to technological advancement there is a rise of smartwatches, automation in manufacturing.

SMARTWATCHES: a major cause of revolution of the watch market

The rise of SMARTWATCHES, led by brands like Apple, Samsung etc has redefined consumer expectations. Today watches are not only used for time checking, but smartwatches offer various functions like health tracking, GPS, notification, apps etc

Preferences of consumer in Watches

We can see a distinct shift in preference from traditional mechanical watches to multifunctional smartwatches. People also select watches according to brand value like ROLEX. Many consumers now prioritize functionality, choosing smartwatches or fitness trackers with various features like health monitoring, GPS etc.

USES OF WATCH

- 1) To know the exact time
- 2) Watches are also used as a fashion accessory
- 3) For alarms and reminders
- 4) Status of luxury
- 5) Watches are often used for gifting purposes
